

# Green-Vent Wind

**Green-Vent Wind** utilizes renewable wind energy to create positive airflow, drawing out hot, stale air and replacing it with cooler, fresh air from outside.

## Why Ventilation Matters?

Proper ventilation provides significant benefits for residential and commercial buildings:

- **ENERGY EFFICIENCY**
- **BUILDING MAINTENANCE**
- **OCCUPANT HEALTH**
- **PRODUCTIVITY**

## Key Features & Benefits

- **ZERO OPERATING COSTS**
- **ADVANCED PERFORMANCE**
- **DURABLE CONSTRUCTION**
- **WEATHER RESISTANT**
- **GUARANTEED QUALITY**

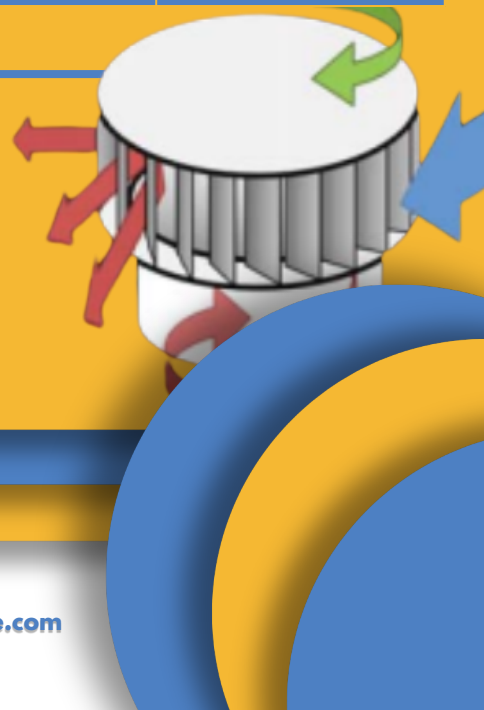

Model	Throat Diameter	Total Weight	Exhaust Capacity (at 12km/hr)
GVW300	300 mm	5 kg	480 L / sec
GVW400	400 mm	8 kg	688 L / sec
GVW600	600 mm	12 kg	1,104 L / sec
GVW900	900 mm	25 kg	2,700 L / sec

# Green-Vent Wind 300 Plus

## The Ultimate Hybrid in Roof Ventilation

The Green Vent Wind 300 Plus represents the next generation of attic climate control, strategically combining the natural efficiency of the GVW 300 with the advanced solar-driven power of the Whirlwind Plus system. Engineered for those who require a higher exhaust capacity than standard models, the 300 Plus offers a "bit stronger" performance profile to ensure your building stays cool and moisture-free under the most demanding conditions.

- **DUAL-POWER HYBRID**
- **CONTINUOUS OPERATION**
- **SUPERIOR STRENGTH**
- **WEATHER RESISTANT**

### Key Features & Benefits

- **INCREASED PRODUCTIVITY**
- **MOISTURE CONTROL**
- **ENERGY EFFICIENCY**
- **WHISPER QUIET**

Feature	Specification
Throat Diameter	300mm
Motor	High-performance 36V-38V DC Motor
Exhaust Capacity (Wind)	480 L/sec @ 12km/hr
Enhanced Performance	Up to 100% increase in flow rate with Solar Power
Wind Speed Rating	205.2 km/hr (57m/s) - Performance Level 1
